Plexiglas cover

Plexiglas cover

Plexiglas covers are used for heating objects requiring air-conditioning. Together with the low pressure table, the cover constitutes an enclosed space. The object on the low pressure table can be viewed through the fully transparent cover. The unit is pre-equipped for the connection of ultrasonic humidifiers and air filters. The cover is made of 4 mm thick blow-moulded Plexiglas mounted in a fully sealed aluminium frame which rests flush on the outer frame of the low pressure table. The cover can be hinged up easily and is maintained in the raised position by gas springs which also act as a counterbalance.

Accessories

Ultrasonic humidifiers

For humidifying artworks on paper. The intensity of the aerosol is adjustable.

Technical data:

Maximum spraying capacity: 0.5 l/h

Spray tank capacity: 10 l

Power rating: 75W Intensity controller

Dimensions: 330 x 280 x 460 mm

Air filter

Paper filter in an impact-resistant polypropylene casing. The filter cartridge is easy to replace when necessary.

Collection level: coarse 99.8%, fine 99.5%
